

SHAIMAA ALMOUSLY

AI Engineer | Open to Remote / International Opportunities
shaimaaalmously054@gmail.com | +963 981 197 689 | Damascus, Syria | [LinkedIn](#) · [GitHub](#)

SUMMARY

AI Engineer with a strong foundation in machine learning, computer vision, and LLM-powered applications, demonstrated through academic and independent projects — including a graduation project achieving 93.6% behavior recognition accuracy and an LLM-based company intelligence platform combining web search, content extraction, and RAG-style reasoning. Active in volunteer technical leadership and mentorship. Pursuing an AI Engineer role, open to remote and international opportunities, where deep learning, NLP, and API-integrated systems create measurable value.

TECHNICAL SKILLS

- **Languages:** Python (primary), SQL (PostgreSQL)
- **ML / DL:** Scikit-learn, PyTorch, ConvLSTM, Random Forest, TF-IDF, feature engineering
- **Computer Vision:** OpenCV, YOLOv8, OpenPose, skeletal keypoint extraction (DIFEM method)
- **NLP & LLM:** Prompt engineering, LLM-based pipelines (DeepSeek / OpenAI APIs), RAG-style workflows, Arabic NLP
- **Frameworks:** FastAPI, REST API design, SerpAPI, Firecrawl
- **Data:** Pandas, NumPy, GeoPandas, Matplotlib

EXPERIENCE

AI Engineer Track — Completed with Distinction | *Averroa IT Launchpad, Syria Cohort — June 2026*

- Completed the Averroa IT Launchpad program with Distinction for outstanding engagement, professionalism, and achievement (Certificate ID: AL-SYR-2026-017).
- Covered IT career readiness, certification strategy, proof-of-skill portfolio building, and CV/LinkedIn positioning; applied these frameworks directly to personal CV, GitHub portfolio, and LinkedIn presence.

PROJECTS & APPLIED EXPERIENCE

Account Intelligence Radar — LLM/RAG-Based B2B Intelligence Platform | *Python · FastAPI · SerpAPI · Firecrawl · DeepSeek/OpenAI · SQLite · Git — 2026*

- Built a persistent B2B intelligence platform turning a company name into a structured, evidence-backed report, replacing one-off searches with a full research lifecycle (search, save, revisit, compare, detect changes)
- Designed a multi-stage RAG pipeline (SerpAPI discovery → LLM-based source selection → Firecrawl extraction) with a deterministic fallback for LLM provider failures
- Implemented persistent accounts, historical scan comparisons with automated change detection, and multi-format exports (JSON, Markdown, PDF)
- Validated with 15 automated backend/integration tests covering auth, comparisons, and security

Smart Behavior Monitoring System — Graduation Project | *Python · PyTorch · YOLOv8 · OpenPose · ConvLSTM · Scikit-learn — 2026*

- Designed and built an end-to-end computer vision system to detect and classify children's behaviors in real time using skeletal keypoint data from video streams.
- Developed the Dynamic Image Feature Extraction Method (DIFEM), a novel approach extracting velocity, acceleration, joint angles, and spatial overlap from 12 OpenPose keypoints.
- Integrated ConvLSTM for spatio-temporal recognition and trained a Random Forest classifier, achieving 93.6% classification accuracy.
- Conducted full model evaluation using precision, recall, and F1 score; performed hyperparameter tuning to optimize performance on the validation set.

Arabic Dialect Identification — NLP Classification | *Python · Scikit-learn · TF-IDF — 2025*

- Built multi-class text classifiers on a multi-dialect Arabic dataset; applied tokenization, normalization, and TF-IDF vectorization.
- Compared classical ML (TF-IDF) and CNN architectures with FastText embeddings, reaching up to 80% test accuracy on 5-way regional dialect classification; documented tradeoffs across country-, region-, and city-level granularity.

[GitHub →](#)

Mobility Pattern Analysis — Washington D.C. Bicycle Trips | *Python · Pandas · GeoPandas · Matplotlib — 2025*

- Analyzed 6.1M+ bicycle trip records to extract spatial and temporal usage patterns, finding Ballston Metro/Stuart St & 9th St N as the busiest station (~18K trips) and revenue peaking in spring/summer.

LEADERSHIP & PROFESSIONAL DEVELOPMENT

Strategic Operations & Podcast Team | *SharafAI — April 2026 to July 2026*

- Supervised one AI-focused initiative and authored strategic development plans (podcast content plan, Partnerships team operating plan covering external relationships, funding, and logistics); organized and coordinated 10 workshops/training sessions delivered within the initiative.

Mentee | *GMI Mentorship Program — 2026 to Present*

- Working with a mentor to translate technical skills into a clear professional narrative and a sustainable long-term AI Engineer career plan.

EDUCATION

B.Sc. Informatics Engineering, AI & Natural Language Processing | *University of Damascus — 2021 to 2026*

- Focus: machine learning, deep learning, computer vision, NLP, and software engineering fundamentals.
- Graduation project recognized for novel feature extraction methods (DIFEM) and high model accuracy.

Continuing Professional Development

- ML Specialization & Advanced Learning Algorithms (Andrew Ng, Coursera, 2025); ML Mini Bootcamp, Yasmin AI (2025)

Languages: English (C2 — Proficient), Arabic (Native)
